DEEPMALA POWER INDUSTRIES

COMPANY OVERVIEW

Deepmala was established in India in the year 2020 by MR. DEEPAK KUMAR BANA & MRUDAY CHOUDHARY - Founder & Director of **DEEPMALA POWER INDUSTRIES**, an agriculturist by birth and an entrepreneur by passion.

DEEPMALA POWER INDUSTRIES is the growing battery manufacturing company in India. The company produces Tubular batteries for UPS and Solar applications using the highest quality standards to give you the best experience.

EXPERTISE

Our expertise in TUBULAR Batteries extends to UPS and Solar application so that life remains full of energy and uninterrupted. We represent world class range of TUBULAR Batteries for UPS and Solar applications assembled, produced by a highly skilled engineering team for our customers. Whether solar or lead acid batteries, **DEEPMALA POWER INDUSTRIES** products last long and are reliable, giving you an unmatched experience.

PRODUCT PORTFOLIO

MISSION

To design and deliver cutting-edge, durable, and sustainable energy solutions that empower progress and brighten up lives worldwide.

VISION

To be the global leader in energy storage technologies by fostering innovation, sustainability, and exceptional customer experiences.

QUALITY

Recognition of our pursuit of quality was achieved when we were awarded the ISO 9001. Our Automotive Division is certified as R and TM.

Smart charging Batteries

Non-Controlled Charging Protection

High Current Sustainability

Low Maintenance & High Performance

POWER & SUPPLY

At DEEPMALA POWER INDUSTRIES, we offer a comprehensive range of energy storage solutions designed to meet the diverse power needs of modern life. From the roads to the industrial floor, our products are engineered for power, longevity, and reliability.

Solar Batteries

Our Packaging Meets International Standards

Equipped with state-of-the-art facilities, our manufacturing units adhere to stringent international quality standards. From precision engineering to rigorous testing, each step in our process ensures superior performance, durability, and reliability. Our commitment to innovation reflects in our continual adoption of advanced technologies.

LEADERSHIP

A leader in packaged power technology, Perfect Battery today is one of the largest storage battery company with widest range of both conventional flooded batteries.

STRATEGY & RESEARCH

To manufacture high-performance and dependable batteries that deliver long-lasting power, advanced safety, and maintenance-free performance. We aim to support everyday mobility through innovative technology, quality engineering, and customer-focused energy solutions.

ENHANCE INNOVATION

To become a leading battery technology brand recognized for innovation, sustainability, and energy efficiency while driving the future of smart mobility with eco-friendly and reliable power solutions worldwide.

TUBULAR BATTERIES

Manufactured for every need we use tubular plate technology in our batteries in order to accumulate more active material in comparison to other plate technologies. The use of export quality woven gauntlets leads to better capacity due to the low electrical resistance and consistent results throughout the life of the battery. It also enhances the battery performance and life of the batteries. Our batteries guarantee reliable and steady performance, even under heavy load. Suited for frequent and long power cuts, these batteries have a long life cycle.
